

What is the Cloud?

"Cloud Computing" refers to the on-demand delivery of IT resources and applications via the Internet with pay-as-you-go pricing.

Why run your applications on the AWS Cloud with Alef Nula a.s.?

Reduce TCO

Lower your TCO by paying only for what you use and improving resource optimization.

No More Hardware

Quit wasting valuable time procuring, deploying, and managing hardware and instead focus on your core competencies and customer relationships.

Same Tools and Capabilities

AWS is compatible with your existing applications, processes, virtual machines, software licenses, and more.

The time to migrate to the cloud is now

Cloud computing provides a simple way to access servers, storage, databases and a broad set of application services over the Internet.

AWS allows you to purchase what you need on-demand and does not require minimum commitments or unfront costs.

No More Hardware

Reduce TCO

Same Tools and Capabilities

No More Hardware

With AWS you can access the computing resources you need, without any upfront costs or risk of wasted money or restricted capacity. Unlike investing in your own server hardware, AWS does not require minimum commitments or long term contracts—you can downsize or discontinue service if you choose.

See how much you can save by moving from onpremises hardware to AWS >
